ABOUT ANGOLA CABLES:

Angola Cables is an internationally established ICT and digital solutions and network services provider. The company specializes in connectivity solutions for the wholesale market and offers tailored digital services and solutions across multiple industries, including Cloud resources for the corporate enterprise sector.

Known for its innovation, Angola Cables operates a robust global backbone network, providing access to major IXPs, Tier I operators, and global content providers. With more than 30 POPs and connections to 66 interconnected Data Centres and 6000 peering agreements, traffic over its international network is in excess of 18 500 Tbps.

The company has its own submarine cable network spanning over 33,000 kilometres (WACS, SACS, and MONET) and extends its services to over 50,000 kilometres through partner cables, connecting the Americas, Africa, Europe, and Asia.

Additionally the company operates two world-class Data Centres, AngoNAP Fortaleza in Brazil and AngoNAP Luanda in Angola. Angola Cables also manages PIX in Brazil and AngonIX in Angola - one of the leading Internet traffic exchange points in Africa that directly connects to over 27 IXPs worldwide.

With a significant international presence, Angola Cables is expanding its operations into strategic markets such as Brazil, South Africa, the United States, Nigeria, and Portugal. The company promotes intercontinental interconnection, driving digital and economic development, and ranks among the top 25 Internet service providers in the world today.
