

Remote Peering

Angola Cables brings a suite of international Internet Exchange Points to your network through our submarine cable systems.

LOW LATENCY

ACCESS TO MAJOR IXPs

FLEXIBLE PORT AND
CAPACITY OPTIONS

Remote Peering allows internet providers to participate and have multiple connection possibilities at major international Internet Exchange Points (IXPs) through an agile, cost-competitive solution without the need for a physical presence.

RECOMMENDED FOR:

Entities seeking an efficient and cost-competitive solution to expand their connectivity to the largest IP hubs.

BENEFITS

- Gain international presence, cost savings, and efficiency in routing options.
- Low latency and direct connection to major IXPs.
- Rapid entry into new markets.
- Autonomy to peer (connect) with any member entity of the Internet Exchange Point.

SERVICE FEATURES

Technology: Ethernet

Ports: 1GE and 10GE

About Angola Cables:

Angola Cables is an internationally established ICT and digital solutions and network services provider. The company specializes in connectivity solutions for the wholesale market and offers tailored digital services and solutions across multiple industries, including Cloud resources for the corporate enterprise sector.

Known for its innovation, Angola Cables operates a robust global backbone network, providing access to major IXPs, Tier I operators, and global content providers. With more than 30 POPs and connections to +930 interconnected Data Centres and 6.000 peering agreements, traffic over its international network is in excess of 18.500 Tbps.

The company has its own submarine cable network spanning over 33,000 kilometres (WACS, SACS, and MONET) and extends its services to over 50,000 kilometres through partner cables, connecting the Americas, Africa, Europe, and Asia.

Additionally the company operates two world-class Data Centres, AngoNAP Fortaleza in Brazil and AngoNAP Luanda in Angola. Angola Cables also manages PIX in Brazil and AngonIX in Angola - one of the leading internet traffic exchange points in Africa that directly connects to over 45 IXPs worldwide.

With a significant international presence, Angola Cables is expanding its operations into strategic markets such as Brazil, South Africa, the United States, Nigeria, and Portugal. The company promotes intercontinental interconnection, driving digital and economic development, and ranks among the top 25 internet service providers in the world today.
